

N RAJITHA

Full-Stack Developer | Python · Django · REST APIs · Google Cloud Platform

Bengaluru, India · +91 9581356768 · nrajitha142@gmail.com · [linkedin.com/in/n-rajitha](https://www.linkedin.com/in/n-rajitha) · [Portfolio](#) · github.com/nrajitha-dev

PROFESSIONAL SUMMARY

Full-Stack Developer with hands-on experience in Python, Django, REST API development, and MySQL database design. Delivered end-to-end web applications covering authentication, role-based access control, and responsive frontends. Google Cloud Arcade Silver League graduate (41,763 points, 100+ badges) with practical skills across Compute Engine, Kubernetes Engine, BigQuery, Vertex AI, Cloud Run, and Terraform. Strong background in software testing, QA validation, and Agile development workflows.

TECHNICAL SKILLS

Languages	Python, JavaScript, SQL
Backend	Django, Django REST Framework, Flask, REST API Design
Frontend	HTML5, CSS3, JavaScript, Responsive Web Design
Databases	MySQL, PostgreSQL, SQLite, BigQuery, Cloud Spanner, Firebase Firestore
Cloud (GCP)	Compute Engine, Cloud Run, Cloud Functions, App Engine, Cloud Storage, Kubernetes Engine (GKE), Vertex AI, Gemini API, BigQuery ML, Terraform, Dataflow, Firebase, Cloud IAM, Security Command Center, Natural Language API, Vision API
DevOps & Tools	Git, GitHub, Docker (basics), Terraform, VS Code, Postman, Linux CLI
Testing & QA	Manual Testing, API Testing, Functional Testing, Regression Testing, Integration Testing, UAT, Test Case Design, Bug Reporting, Agile/Scrum
Concepts	OOP, Data Structures, SDLC, Microservices, CI/CD (basics), Serverless Architecture

PROFESSIONAL EXPERIENCE

Full-Stack Developer Intern

Qspiders · Bengaluru, India · January 2026 – April 2026

- Developed and deployed Python/Django web application features end-to-end, resolving 15+ bugs across backend business logic and REST API endpoints, improving application reliability.
- Designed and optimized MySQL database queries for a student management module, reducing average query response time by approximately 30% through indexing and query restructuring.
- Built and integrated REST API endpoints using Django REST Framework, supporting CRUD operations and JSON data exchange between frontend and backend components.
- Participated in 2 Agile sprint review cycles per month using Git version control and GitHub, contributing to code reviews for a team of 4 developers.
- Authored technical documentation including API contracts, database schemas, and deployment guides adopted across the full development team.

PROJECTS

Full-Stack Student Management System

[Python](#) · [Django](#) · [Django REST Framework](#) · [MySQL](#) · [HTML5](#) · [CSS3](#) · [JavaScript](#) [\[GitHub\]](#)

- Architected and built a full-stack web application managing academic records for 500+ students, implementing complete CRUD operations with role-based access control for 3 user roles (Admin, Teacher, Student).
- Implemented secure user authentication using Django's built-in auth system with session management and JWT-based API authentication, preventing unauthorized data access.
- Designed normalized relational database schema with 8+ tables in MySQL; wrote optimized SQL queries reducing page load time by 25% compared to initial implementation.
- Built RESTful API endpoints using Django REST Framework to support frontend-backend data exchange, tested across 10+ endpoints using Postman.
- Developed responsive UI using HTML5, CSS3, and JavaScript; validated cross-browser compatibility across Chrome, Firefox, and Edge.

Software Testing & QA Validation Suite

[Postman](#) · [Manual Testing](#) · [JIRA](#) · [Test Case Design](#) · [Bug Reporting](#) [\[GitHub\]](#)

- Designed and executed 40+ functional, integration, and system test cases covering 5 core application modules using structured test case design techniques.
- Performed API testing on 10+ REST endpoints using Postman; identified and logged 12 defects with severity/priority classifications and detailed reproduction steps in JIRA.
- Conducted regression testing across 2 release cycles and participated in User Acceptance Testing (UAT) sign-off as part of an Agile team of 5.
- Prepared comprehensive bug reports and QA documentation following industry-standard templates, contributing to a 20% reduction in post-release defect rate.

CERTIFICATIONS & CREDENTIALS

Google Cloud Arcade — Silver League (41,763 pts · 100+ Badges)

Google Cloud Skills Boost · August – December 2025 · [\[View Profile\]](#)

- Earned 100+ verified skill badges across Google Cloud Platform domains including infrastructure, data engineering, AI/ML, security, serverless, and developer tools.
- Key skill badges: Build a Data Warehouse with BigQuery · Deploy Kubernetes Applications on GKE · Develop Serverless Apps with Cloud Run · Build Infrastructure with Terraform · Develop Gen AI Apps with Gemini & Streamlit · Engineer Data with BigQuery ML · Implement Cloud Security Fundamentals · Secure Software Delivery.
- Completed Google Cloud Digital Leader learning path covering AI/ML innovation, data transformation, cloud operations, and responsible AI principles.

EDUCATION

Bachelor of Technology — Computer Science & Engineering

Sri Venkateswara College of Engineering · 2022 – 2026 · CGPA: 9.06 / 10
